

Year 9 Health Assessment

11/02/2019

Dear Year 9 Parents/Guardians,

Hastings Boys' High School is part of the School based Health Service. This service is funded by the government and provides free health care for students in several secondary schools in Hawke's Bay. Public Health Nurses: Jesse Hohaia-Hall, Diane Huriwai and Sally Bone will be working at Hastings Boys' High School this year and will be offering all Year 9 students a health and development assessment. Their verbal consent will be required before this is completed.

These health checks promote and support a young person's physical, mental, social, spiritual and emotional wellbeing thus supporting their learning and school performance. This is an opportunity to assist and improve health outcomes for all students whilst encouraging positive youth development.

If you have any questions or would like to speak to us about the assessment process please contact us through the Flaxmere Community Health Centre on 06 8799440.

Yours sincerely,

Jesse Hohaia-Hall RN, Diane Huriwai RN and Sally Bone RN.
